

**What can a
Housewife do
to prevent a war?**

She can volunteer to serve
a few hours a week
In the Ground Observer Corps!

Your country, your home is faced with the possibility of an atomic attack. At this very moment, the Soviets have over a thousand heavy bombers capable of striking any point in the United States. To meet this threat, our armed services are on twenty-four hour duty, but they need help - your help! They need your eyes and ears in the Ground Observer Corps.

As a civilian spotter you will learn to detect hostile aircraft that may be trying to sneak through our Radar. You'll also be helping to strengthen our defenses...and the stronger our defenses grow, the less chance an aggressor has of making a successful attack. This fact could prevent World War III. Volunteer to do your part in the Ground Observer Corps today! You'll feel better for it!

**Keep your eye on the sky in the
GROUND OBSERVER CORPS**
